SUMMARY

UX Designer and Apple Technical Specialist creating accessible, research-informed digital experiences. Translate user and stakeholder insights into clear flows, visual systems, prototypes, and implementation-ready recommendations. Skilled in Figma, Sketch, SwiftUI, usability testing, design systems, WCAG, Section 508, and Apple Human Interface Guidelines.

EXPERIENCE

Apple — Technical Specialist | Dallas, TX

Jan 2025 – Present

- Diagnose hardware and software issues across iPhone, iPad, and Apple Watch using structured troubleshooting, diagnostic tools, observation, and needs discovery.
- Use probing questions, active listening, and behavioral observation to uncover needs and translate technical findings into clear guidance for varied audiences.

Apple — Product Specialist | Dallas, TX

Sep 2024 – Jan 2025

- Conducted needs-based discovery to understand customer goals and workflows, then recommended Apple products and services aligned with individual needs.
- Guided setup, iCloud migration, feature discovery, demonstrations, and personalized recommendations while adapting communication to each customer.

Apple Benevity Program — Visual Design Volunteer

2026 – Present

- Contributed 100+ hours of visual design volunteer work supporting nonprofit organizations through Apple's Benevity program.
- Designed and refined visual assets, layouts, and digital experiences using typography, color, hierarchy, accessibility, interaction design, and stakeholder feedback.

Catchafire — Volunteer UX Designer | United States

Nov 2022 – Present

- Led 100+ nonprofit UX engagements representing \$650K+ in donated professional services, improving usability, accessibility, navigation, and digital experience quality.
- Conducted stakeholder discovery, usability testing, accessibility reviews, and research synthesis; translated findings into prioritized design recommendations.

Frost Trade LLC — UX Designer | Dallas, TX

Aug 2021 – Sep 2024

- Designed accessible digital experiences for government and nonprofit organizations, translating stakeholder requirements and user needs into clear interface solutions.
- Conducted interviews and usability tests, then created user flows, wireframes, prototypes, and high-fidelity Figma and Adobe XD designs for developer handoff.

SELECTED UX PROJECTS

NeuroMode | Cognitive Accessibility • Product Design • Native iOS

- Designed and built a native SwiftUI experience for initiation, focus, sensory comfort, and interruption recovery, with support available without requiring diagnosis or disclosure.
- Made the design reasoning visible through research framing, IA, interaction trade-offs, reconstructed wireframes, a Figma-ready handoff, accessibility review, and validation.

Tools: SwiftUI, Xcode, Figma, SwiftData, XCTest/XCTest, Apple HIG, accessibility QA

Gather | Product Design • Visual Design • Native iOS

- Designed and built a SwiftUI concept that helps groups move from scattered ideas to a shared plan through requirements, private voting, consensus, and final-plan actions.
- Applied Apple HIG, Dynamic Type, accessibility patterns, adaptive layouts, and an iPhone Duo design exploration.

Tools: SwiftUI, Xcode, Apple HIG, Dynamic Type, accessibility QA, interaction design

UXD Systems | Visual Design • Design Systems • Prototyping

- Designed and built an interactive design-systems platform covering typography, color, hierarchy, tokens, component behavior, and responsive UI patterns.
- Applied Apple HIG and established design-system principles to accessible demonstrations, live token exploration, and cross-system comparisons.

Tools: Figma, React/Next.js, HTML/CSS, JavaScript, GitHub

UXR Forge | User Research • Synthesis • Usability

- Designed and built a UX research platform for research planning, methodology selection, data collection, usability evaluation, synthesis, and reporting.
- Shows how qualitative and quantitative evidence becomes patterns, findings, recommendations, and product direction through guided, traceable workflows.

Tools: Figma, research planning, usability testing, synthesis, prototyping, GitHub

EDUCATION

Western Governors University

2026 – Present

Bachelor of Science, User Experience Design — In Progress

Focus: user research, interaction design, visual design, accessibility, prototyping, and human-computer interaction.

CERTIFICATIONS

Google UX Design Professional Certificate | Google | Sep 2026

Microsoft UX Design Professional Certificate | Microsoft | Apr 2026

IBM UI/UX Designer | IBM

Adobe Graphic Designer: Design that Demands Attention | Adobe | Apr 2026

Human-Computer Interaction I: Fundamentals & Design Principles | edX | Apr 2026

SKILLS

Visual Design: Figma, Sketch, Adobe XD, interface design, typography, color theory, visual hierarchy, prototyping, design systems, Apple HIG

User Research: mixed methods, interviews, usability testing, data collection, synthesis, facilitation, findings and recommendations

Accessibility & Collaboration: WCAG 2.2, Section 508, keyboard and screen-reader accessibility, semantic structure, information architecture, interaction design, Keynote, Jira, stakeholder presentations
