# Helping SBF supporters buy with confidence

Research findings and proposed decisions for SBF

De’Andre Perry
UX Designer & Researcher

# P09 wanted to buy personalized apparel

## Meet P09

An SBF event supporter shopping on their phone

**The goal**

**Choose apparel, personalize it, and understand the order before paying.**

**User story**

As an SBF supporter, I want to buy apparel with my chosen personalization so I can support the organization and know what I will receive.

# Then the store left P09 unsure

**P09 found an item on their own.**

But when personalizing it, they could not tell whether their choices were confirmed.

They found delivery information, then hesitated again when the order total changed.

**P09 did not complete personalization or final review independently.**

# What is at stake for the shopper and SBF

## The shopper needs clarity

Will the item match my choices?

What will I pay?

When should it arrive?

## SBF needs a dependable store

Supporters can make an informed purchase.

The team can spend less time resolving avoidable uncertainty.

Proposed implications; implementation and business outcomes have not been evaluated

# Study protocol and participants

**10**

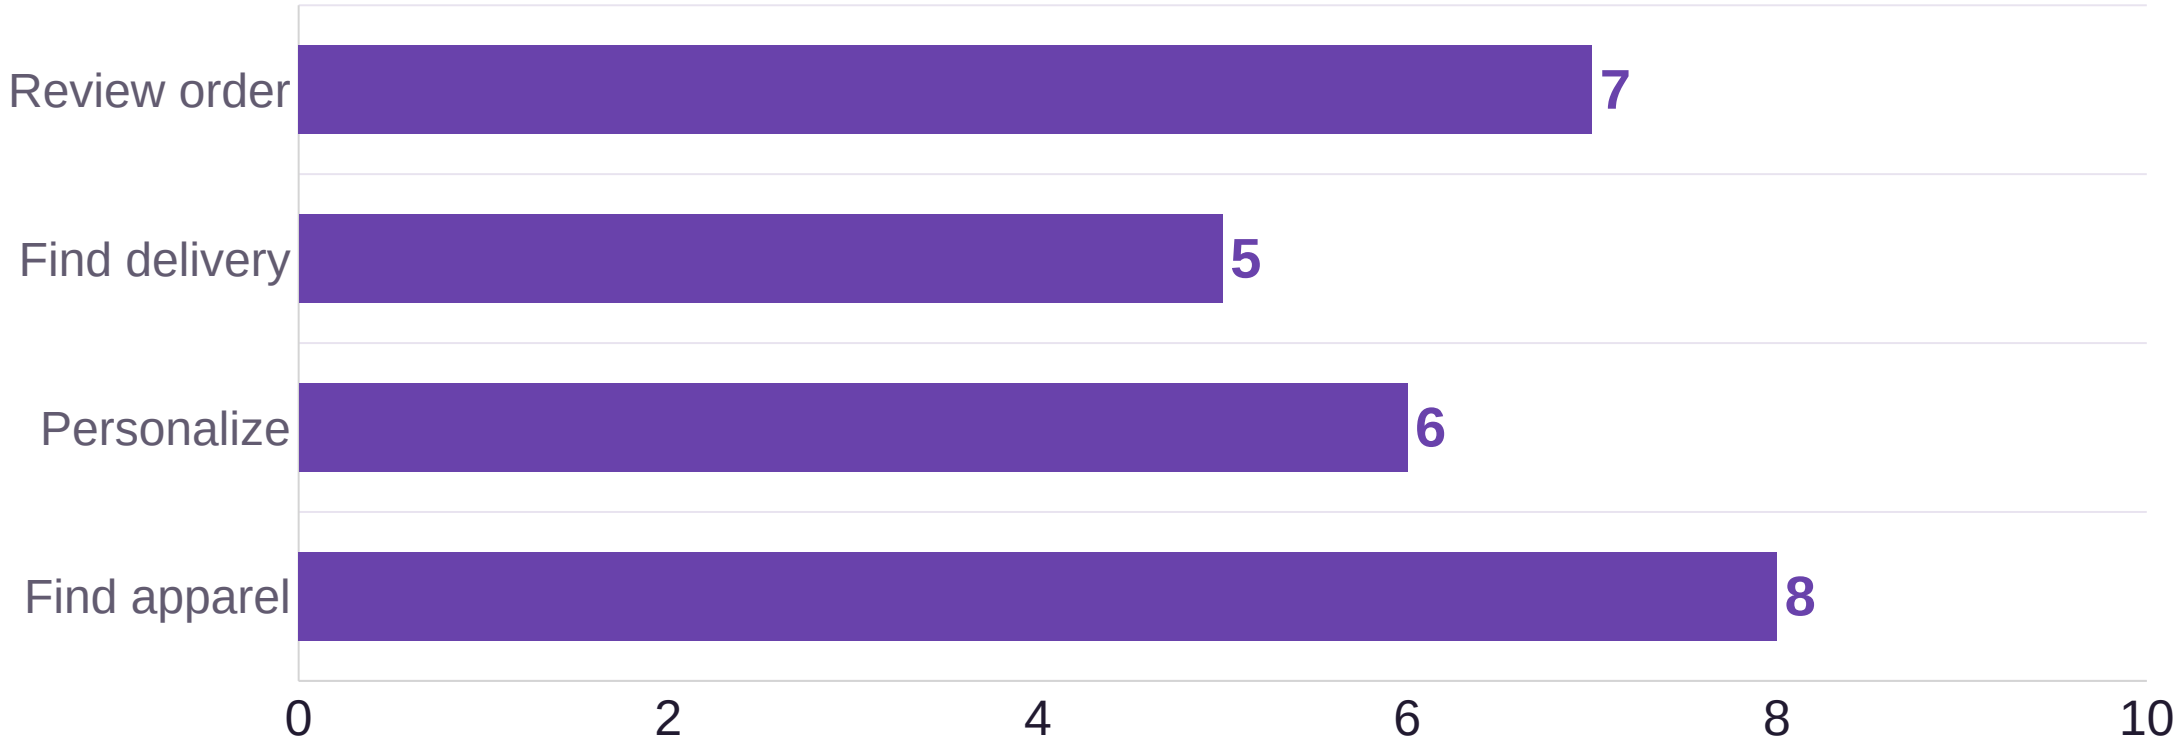

Prior donors
5 mobile / 5 desktop

**Moderated think-aloud protocol**
**Four core tasks; stop before payment**

Find apparel
Personalize an item
Find delivery details
Review without paying

Protocol: 35–45 minutes per session

# Delivery information was the hardest task

Independent completions out of 10 participants, counted separately for each task

# Delivery details were difficult to find

**5 / 10**

did not find delivery information independently

### Session observations

P01 searched the footer.
P05 looked for the fulfillment policy.
P07 missed delivery reassurance.

### Recommended response

Show production and shipping estimates on the product page, with a clear link to details.

### Why it matters to the shopper

Understand delivery timing before deciding to buy.

### Why it matters to SBF

Unclear delivery details may delay a purchase decision.

# Personalization needed clearer confirmation

**4 / 10**

did not personalize an item independently

### Session observations

P02 rechecked the name field.
P06 could not tell if the number applied.
P09 lacked clear confirmation.

### Recommended response

Confirm each update and keep the selected name or number visible in the order summary.

### Why it matters to the shopper

Know the requested name or number is on the order.

### Why it matters to SBF

Unclear selections may lead to questions or corrections.

# The final review needed more reassurance

**3 / 10**

did not complete order review independently

### Session observations

P04 exited before review.
P07 stopped at checkout.
P09 hesitated when the total changed.

### Recommended response

Present the selected item, personalization, full cost, and fulfillment details together before payment.

### Why it matters to the shopper

Verify the item and full cost before payment.

### Why it matters to SBF

Uncertainty at review may put an intended sale at risk.

# Apparel categories confused two shoppers

**2 / 10**

did not find an item independently

### Session observations

P04 missed the apparel category.
P07 expected shirts in another category.

### Recommended response

Test clearer collection labels and apparel placement with a quick navigation task.

### Why it matters to the shopper

Find the right apparel without guessing the category.

### Why it matters to SBF

Missed categories may prevent supporters reaching a product.

# Three shoppers completed every task

**3 / 10**

completed all four tasks independently

P03 used a collection and summary

P08 used category filters

P10 checked the purchase total

Clear choices and visible details supported their progress

# Recommended order of work

| Priority | Change | Proposed owner |
| --- | --- | --- |
| High | Earlier delivery details | SBF content / fulfillment |
| High | Visible saved personalization | Design / development |
| High | Clear order summary and cost | Design / development |
| Medium | Clearer apparel categories | UX / SBF content |

Priority reflects purchase friction, recurrence, and relevance to SBF

# What a better experience should achieve

**9 / 10**

proposed retest target
for each core task

Repeat the same shopping tasks

Check whether rechecking decreases

Ask shoppers to explain their order

Retest: 10 comparable prior donors, 5 mobile / 5 desktop. Study new supporters and accessibility separately.

# Decisions for SBF

## Give shoppers like P09 confidence before payment

01 Agree on the first changes to test

02 Assign owners and confirm platform feasibility

03 Schedule a review of the next test results

# Appendix · Participant task outcomes

| ID | Device | Find | Personalize | Delivery | Review |
|---|---|---|---|---|---|
| P01 | Desktop | Yes | Yes | No | Yes |
| P02 | Mobile | Yes | No | No | Yes |
| P03 | Desktop | Yes | Yes | Yes | Yes |
| P04 | Mobile | No | No | No | No |
| P05 | Mobile | Yes | Yes | No | Yes |
| P06 | Desktop | Yes | No | Yes | Yes |
| P07 | Mobile | No | Yes | No | No |
| P08 | Desktop | Yes | Yes | Yes | Yes |
| P09 | Mobile | Yes | No | Yes | No |
| P10 | Desktop | Yes | Yes | Yes | Yes |

Yes = completed independently. No = not completed independently. Tasks stopped before payment.
