SOCIAL BUTTERFLIES FOUNDATION

Post-launch store experience survey

Custom apparel store

Research purpose, respondent questionnaire, and reporting guide

Prepared by De'Andre Perry
UX Designer & Researcher

Why we are asking

After launch, SBF needs to understand how the live store works for people who use it. This survey gathers feedback from purchasers, people who leave without ordering, and visitors who are simply browsing.

What we will learn

Whether shoppers report being able to find apparel, understand saved personalization, locate delivery details, and review the full cost. We will also learn what contributes to unfinished purchases and what supporters would improve first.

Why it matters

For supporters, clear information helps them choose an item and understand what they will receive. For SBF, identifying friction can guide improvements that support merchandise sales and reduce avoidable questions about orders.

How the information will be used

Use the responses to prioritize changes and select tasks for post-launch usability testing. Combine reported experiences with store analytics and observed task behavior to evaluate the live experience.

Approximately 3–4 minutes per respondent, subject to a short pilot. Most visitors answer 9–11 questions. The questionnaire is on pages 3–6. Setup and reporting guidance is on page 7.

RESEARCH RATIONALE

What each question tells us

Questions	Information collected	Why it is important
Q1 Visit outcome	Purchased, could not finish, decided against buying, or browsed.	Separates different visitor goals and routes relevant follow-up questions.
Q2–3 Visitor context	Device and prior connection to SBF.	Helps identify differences in reported experience between devices and supporter groups.
Q4 Product discovery	Reported ease of finding interesting apparel.	Identifies whether categories and navigation deserve further investigation.
Q5–6 Personalization	Whether customization was attempted and confidence that choices saved.	Reveals uncertainty that may lead shoppers to recheck, ask questions, or leave.
Q7 Delivery	Clarity and findability of delivery information.	Shows whether shoppers can form useful expectations before ordering.
Q8 Total cost	Clarity of the amount payable at cart or checkout.	Helps identify uncertainty about pricing before payment.
Q9 Overall experience	Reported ease of accomplishing the visit goal.	Provides a consistent perception measure for later survey rounds.
Q10 Reasons for leaving	Reported factors contributing to an unfinished purchase.	Distinguishes interface problems from price, timing, availability, and interruptions.
Q11 Order confidence	Purchasers' confidence in the recorded order details.	Helps identify uncertainty that continues after checkout.
Q12 Open feedback	Changes visitors describe in their own words.	Surfaces needs the fixed response options may have missed.

Connection to the earlier research

The questionnaire revisits the study themes of product discovery, personalization confirmation, delivery information, and final order review. It adds live purchase outcomes and purchaser confidence after checkout.

Source basis: SBF Quantitative & Qualitative Data Summary, prepared November 7, 2026. The survey measures reported experiences. Repeat task-based testing will measure independent task completion.

Your most recent store visit

Help us improve the SBF store

Tell us about your most recent visit to the Social Butterflies Foundation apparel store. Your feedback will help us make shopping easier for supporters. The survey takes approximately 3–4 minutes. Participation is voluntary.

Choose one answer per question unless instructed otherwise. You can select answers and type comments in this PDF, or print it. Follow the skip instructions when a question does not apply.

01 What happened during your most recent visit?

- ○ I placed an order.
- ○ I tried to place an order but couldn't finish.
- ○ I considered ordering but decided to leave without purchasing.
- ○ I browsed without intending to purchase.
- ○ I haven't visited the store.

If you haven't visited the store, stop here. Thank you for your interest.

02 What device did you mainly use?

- ○ Phone
- ○ Laptop or desktop computer
- ○ Tablet
- ○ Another device

03 Before this visit, which best described your connection to SBF?

- ○ I had donated, attended an event, volunteered, or otherwise supported SBF.
- ○ I knew about SBF but hadn't supported the organization before.
- ○ I was learning about SBF for the first time.
- ○ Prefer not to answer

Finding and personalizing apparel

04 How easy or difficult was it to find apparel that interested you?

- ○ Very difficult
- ○ Somewhat difficult
- ○ Neither easy nor difficult
- ○ Somewhat easy
- ○ Very easy
- ○ I wasn’t looking for apparel.

05 Did you try to personalize an item with a name, number, or another custom detail?

- ○ Yes
- ○ No
- ○ I wanted to, but couldn’t find how to do it.

06 How confident were you that your personalization choices had been saved?

Answer only if you selected Yes in Q5. Otherwise, continue to Q7.

- ○ Not at all confident
- ○ Slightly confident
- ○ Moderately confident
- ○ Very confident
- ○ Completely confident
- ○ I couldn’t tell whether they had been saved.

07 How clear was the information about when your order would arrive?

- ○ Very unclear
- ○ Somewhat unclear
- ○ Neither clear nor unclear
- ○ Somewhat clear
- ○ Very clear
- ○ I looked for delivery information but couldn’t find it.
- ○ I didn’t look for delivery information.

Reviewing the purchase

08 When reviewing your cart or checkout, how clear was the total amount you would pay?

- ○ Very unclear
- ○ Somewhat unclear
- ○ Neither clear nor unclear
- ○ Somewhat clear
- ○ Very clear
- ○ I didn’t reach the cart or checkout.

09 Overall, how easy or difficult was it to do what you came to the store to do?

- ○ Very difficult
- ○ Somewhat difficult
- ○ Neither easy nor difficult
- ○ Somewhat easy
- ○ Very easy

10 What contributed to your decision to leave without placing an order?

Answer only if you tried unsuccessfully or decided against ordering in Q1. Select all that apply. Purchasers and casual browsers skip to page 6.

- ☐ I was still comparing options.
- ☐ I planned to purchase later.
- ☐ I couldn’t find the item, size, or option I wanted.
- ☐ I had difficulty personalizing an item.
- ☐ I wasn’t sure my personalization was correct.
- ☐ The product price was more than I wanted to spend.
- ☐ Shipping costs were more than I wanted to spend.
- ☐ I couldn’t determine the full cost.
- ☐ The delivery timing didn’t meet my needs.
- ☐ I couldn’t find enough delivery or return information.
- ☐ I encountered a technical or payment problem.
- ☐ I had difficulty using or accessing part of the website.
- ☐ Something interrupted my visit.
- ☐ Another reason — please describe below.

Order confidence and your feedback

11 After placing your order, how confident were you that the order details matched what you intended to purchase?

Answer only if you placed an order in Q1. Otherwise, continue to Q12.

- ○ Not at all confident
- ○ Slightly confident
- ○ Moderately confident
- ○ Very confident
- ○ Completely confident
- ○ I haven’t reviewed my order details.

12 What, if anything, would you change about the shopping experience?

Optional written response.

Thank you for sharing your experience

Your feedback helps SBF improve the store for its supporters.

SURVEY ADMINISTRATION

Launch, routing, and reporting

Reach people who leave as well as people who buy

Offer the survey in the live store and after order confirmation. Keep wording and recall periods consistent. Avoid interrupting personalization or payment.

Branching for a digital form

Condition	Route
Q1 Has not visited	End survey.
Q5 Yes	Show Q6. Other answers skip Q6.
Q1 Tried but could not finish, or decided against ordering	Show Q10. Purchasers and casual browsers skip Q10.
Q1 Purchased	Show Q11. Other respondents skip Q11.
All store visitors	Finish with optional Q12.

Pilot before wider distribution

Pilot on phone and desktop. Check wording, routing, completion time, and keyboard access. PDF skip instructions are manual. Configure automatic branching in the chosen survey platform.

Report the findings in a way SBF can act on

Report response counts and eligible respondents for each question. Separate non-rating answers such as “didn’t look” and “couldn’t find.” Q10 percentages may total more than 100% because multiple selections are allowed.

Review rating distributions and device or supporter differences when sample sizes allow. Group comments into themes, then connect priorities to a proposed change or follow-up usability task.

Interpret the results alongside behavior

Survey results describe respondents. Use analytics to measure actual conversion, sales, and checkout drop-off. Use comparable usability sessions to evaluate independent task completion. Measure business effects before claiming improvement.
